

## Aquip® Marina & Wash Water Filter enhanced passive media filtration

### Aquip® Advantages

- Treats up to 7,500 square feet of stormwater runoff, or 5 gpm of wash water.
- Removes wide range of pollutants.
- Easy, do-it-yourself installation.
- Internal high flow bypass for no-clog operation.
- No moving parts, no chemicals.
- Easily moved with forklift.

Prevent oil sheen  
& heavy metal  
contamination of  
pristine waterways.

**Aquip (uh-KWIP) 10 and 25** are small-scale, passive water treatment technologies ideal for high performance filtration of stormwater runoff from maintenance areas and oily drainage from ramp boat haul-outs. Aquip may also be used for treating runoff from boat rinsing activities. Aquip 10 and 25 are inherently safe, have no moving parts and require no chemicals. The units are easily moved with a forklift and come ready to install and operate: simply connect your pump and outlet.

Maintenance? Easy! Scrape accumulated sediment from the filter surface and throw it away —no need to deal with messy chemicals, liquids or sludge. Recharge Aquip by periodically adding fresh filtration media to the filter.

Target Pollutants	
Suspended solids	Hydrocarbons
Turbidity	Phosphorus
Metals	

Aquip Model	Treatment Rate (gpm)	Sizing Guideline (acres)*	Footprint (ft x ft)
10S/P	5 -15	< 0.25	3 x 9
25S	12 - 40	0.25 - 0.5	5 x 9

\*Varies by region.

Aquip 10P

### Applications

- Boat ramps & bilgewater
- Boat wash water treatment
- Small sites
- Stormwater treatment

### Options

- Available structures include steel, concrete, and plastic
- Freeze protection, cover and other options available
- Portable — store indoors during winter

StormwaterRx LLC designs, manufactures, installs and maintains stormwater treatment systems for industrial customers. Contact StormwaterRx to find out how we can help you meet your stormwater quality requirements.
